## Projects

---

### Community Tracker

*[GitHub Link](#)*

**Objective:** To build an interactive platform that allows community members to report and track local issues, fostering civic engagement and collaboration.

**Technologies Used:** React.js, Node.js, Express, MongoDB, JWT for authentication, Google Maps API, CSS.

**Features:**

- Authentication & Authorization, Efficient API, Backend Architecture
- Real-Time Voting System
- Google Maps Integration

### Fitness Tracker

*[GitHub Link](#)*

**Objective:** To build an application for tracking fitness activities and promoting healthy habits.

**Technologies Used:** React.js, Node.js, Express, MongoDB, JWT for Authentication, CSS.

**Features:**

- Authentication & Authorization
- Online Voting System
- Making Connections

## Education

---

### National Institute of Technology

Nov 2022 - July 2026

Bachelor of Technology in Computer Science and Engineering

### Vardhman Shiksha Mandir Public School

2019 - 2020

Class 12th (CBSE), Scored 84%

Relevant Coursework:

- Data Structures and Algorithms
- Operating Systems
- Database Management Systems (DBMS)
- Computer Networks
- Object-Oriented Programming (OOP)

## Skills

---

**Programming Languages:** HTML, CSS, JavaScript, C++, C, Python

**Web Development Technologies:** React, Node.js, Express.js, Tailwind CSS

**Databases:** MongoDB, SQL

**Technical Skills:** Agile Development, Version Control (Git), API Development

**Soft Skills:** Problem-Solving, Team Collaboration, Adaptability

## Achievements

---

Solved 500+ Data Structures and Algorithms problems on LeetCode.
